# Setting Printer Queues

There are two ways to set up your printer queues. Both methods open the same form.

The first method is to open Registry->Miscellaneous->Terminal Queues

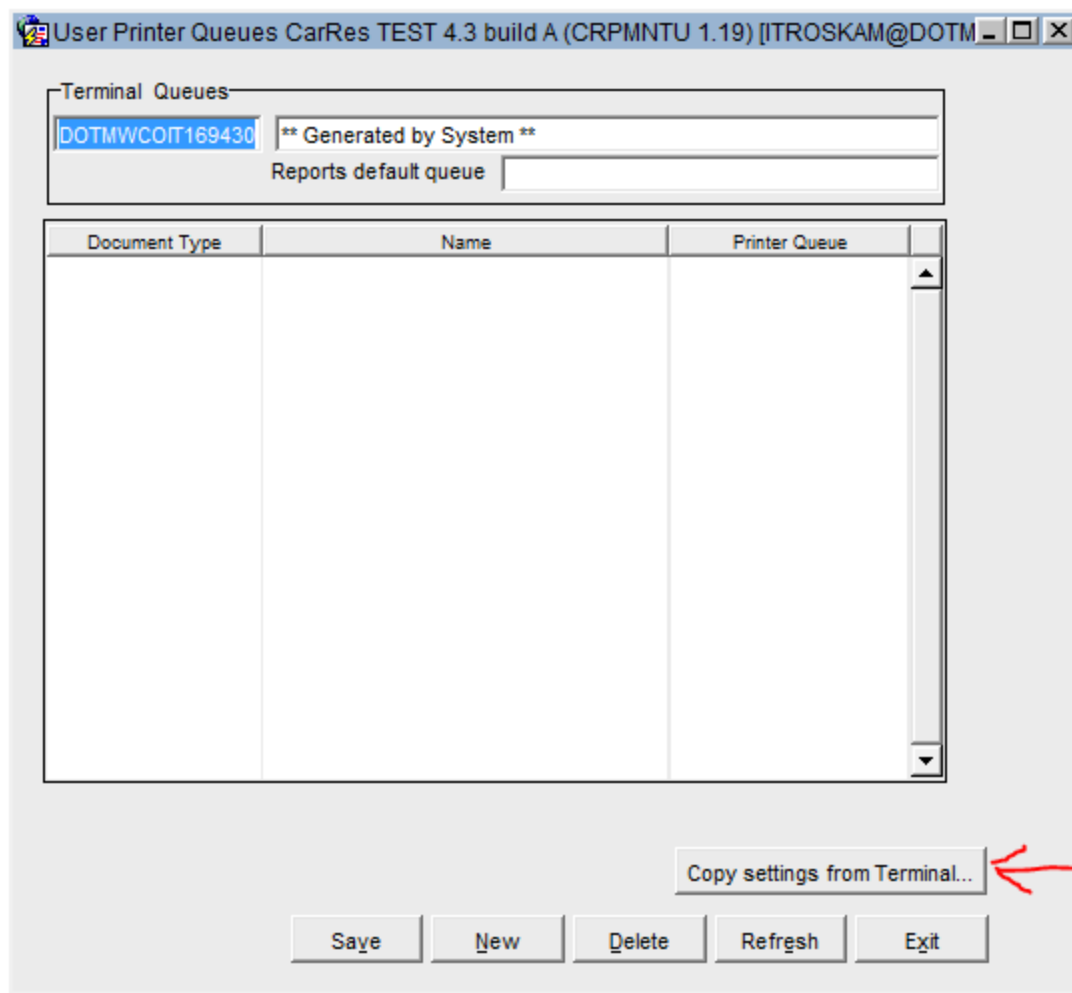

The second method to open the printer queue form is while you are in the booking form.

Select Options->User data and printer queues

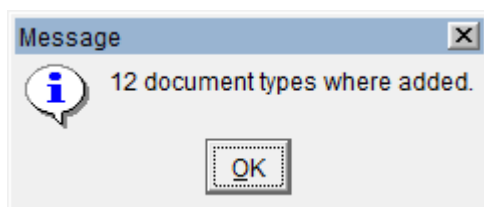

Both of these method will open this form.

To add all of the available printer queues press the "Copy settings from Terminal…" button.

Select AAA DEFAULT and press OK.

Answer Yes

Press OK

Then exit the booking form. You will now be able to send confirmations in CarRes.
